Objective of the Game

Run a profitable
startup

Let's Build a Startup

And Start Ups Fail

The 9 Deadly Sins of New Product Introduction Model

1. Assuming "I Know What the Customer Wants"
2. The "I know What Features to Build" Flaw
3. Focus on Launch Date
4. Emphasis on Execution Instead of Hypotheses, Testing, Learning and Iteration
5. Traditional Business Plans Presume No Trial and No Error
6. Confusing Traditional Job Titles with What a Startup Needs to Accomplish
7. Sales and Marketing Execute to a Plan
8. Presumption of Success Leads to Premature Scaling
9. Management by Crisis Leads to Death Spiral

Re-define Startup ?

" ...a **Temporary** Organization designed to search for a **Scalable, Repeatable and Profitable** Business Model"

- Steve Blank

Re-define Startup ?

" ...a human **institution** designed to deliver a **new product or service** under conditions of **extreme uncertainty**"

-Eric Ries

Lean-Startup

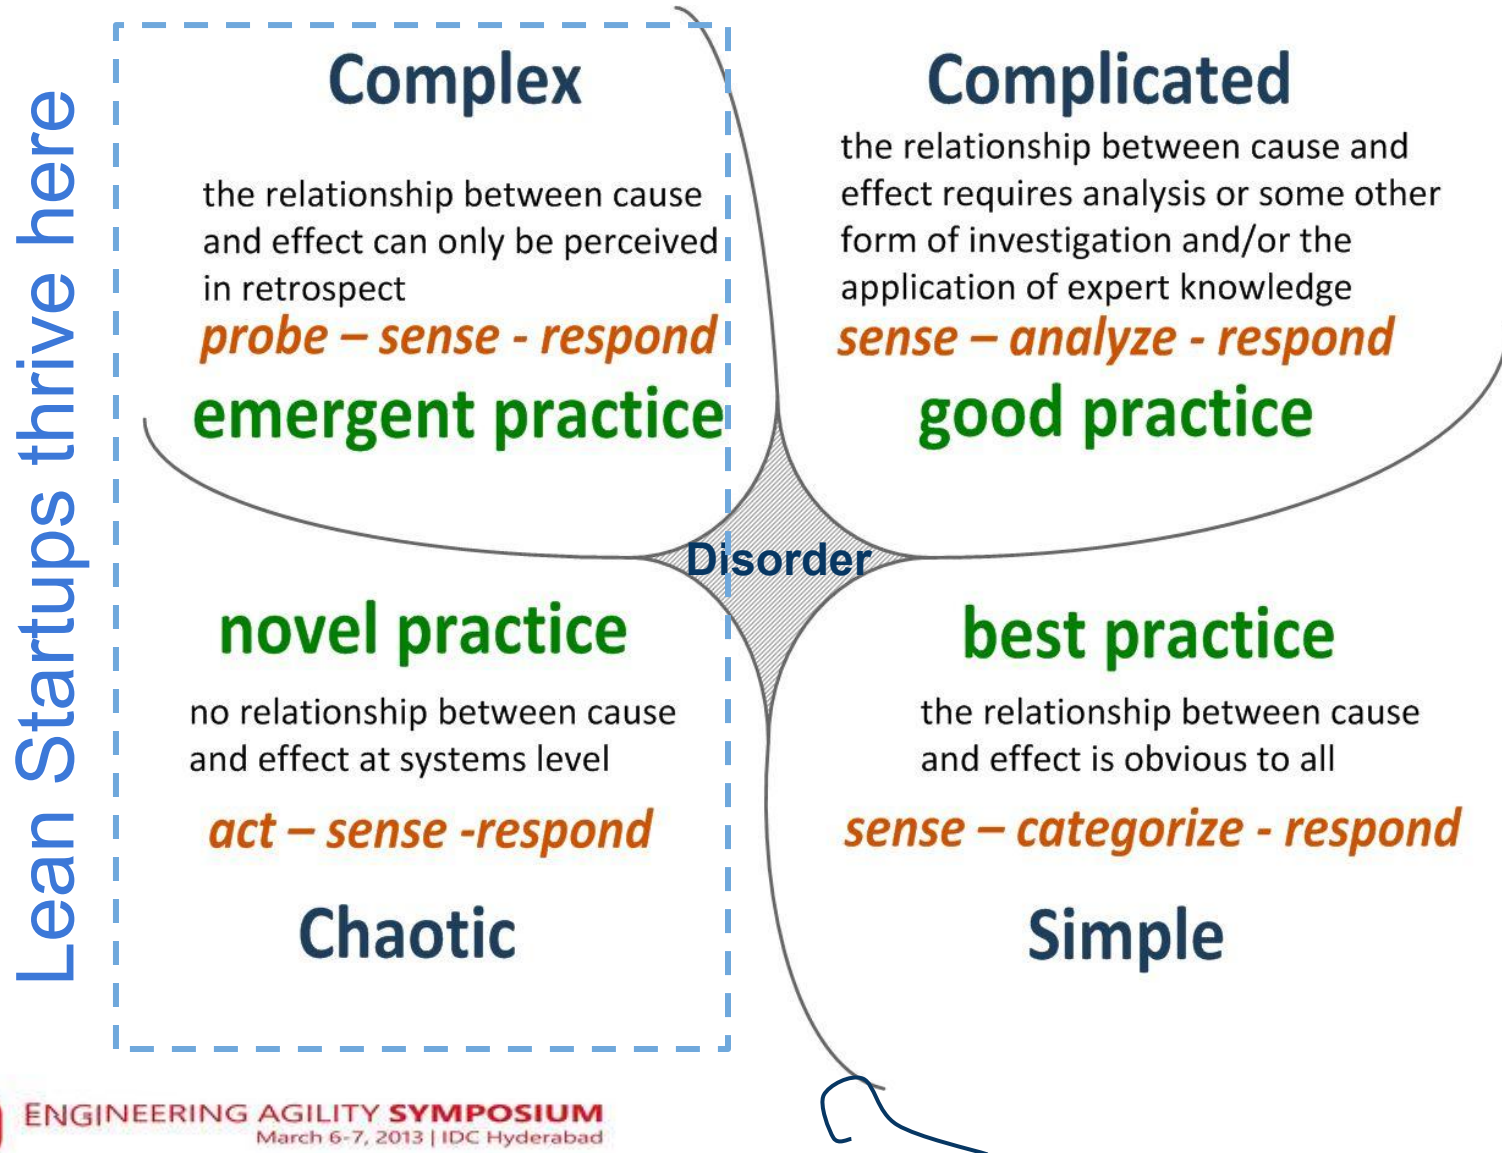

Why is a Startup Different?

The Difference...

	Search (Lean Startup)	Execution (Large Corporation)
Strategy	<i>Business Model Hypothesis</i>	Operating Plan + Financial Model
Process	<i>Customer Development, Agile Development</i>	Product Management
Organization	<i>Founder Driven Customer Development Team</i>	Functional or Cross-functional departments
Education	<i>Business Model Driven, Entrepreneurial Finance, Customer Development</i>	Organizational Behavior, Accounting, Operations, HR, Leadership

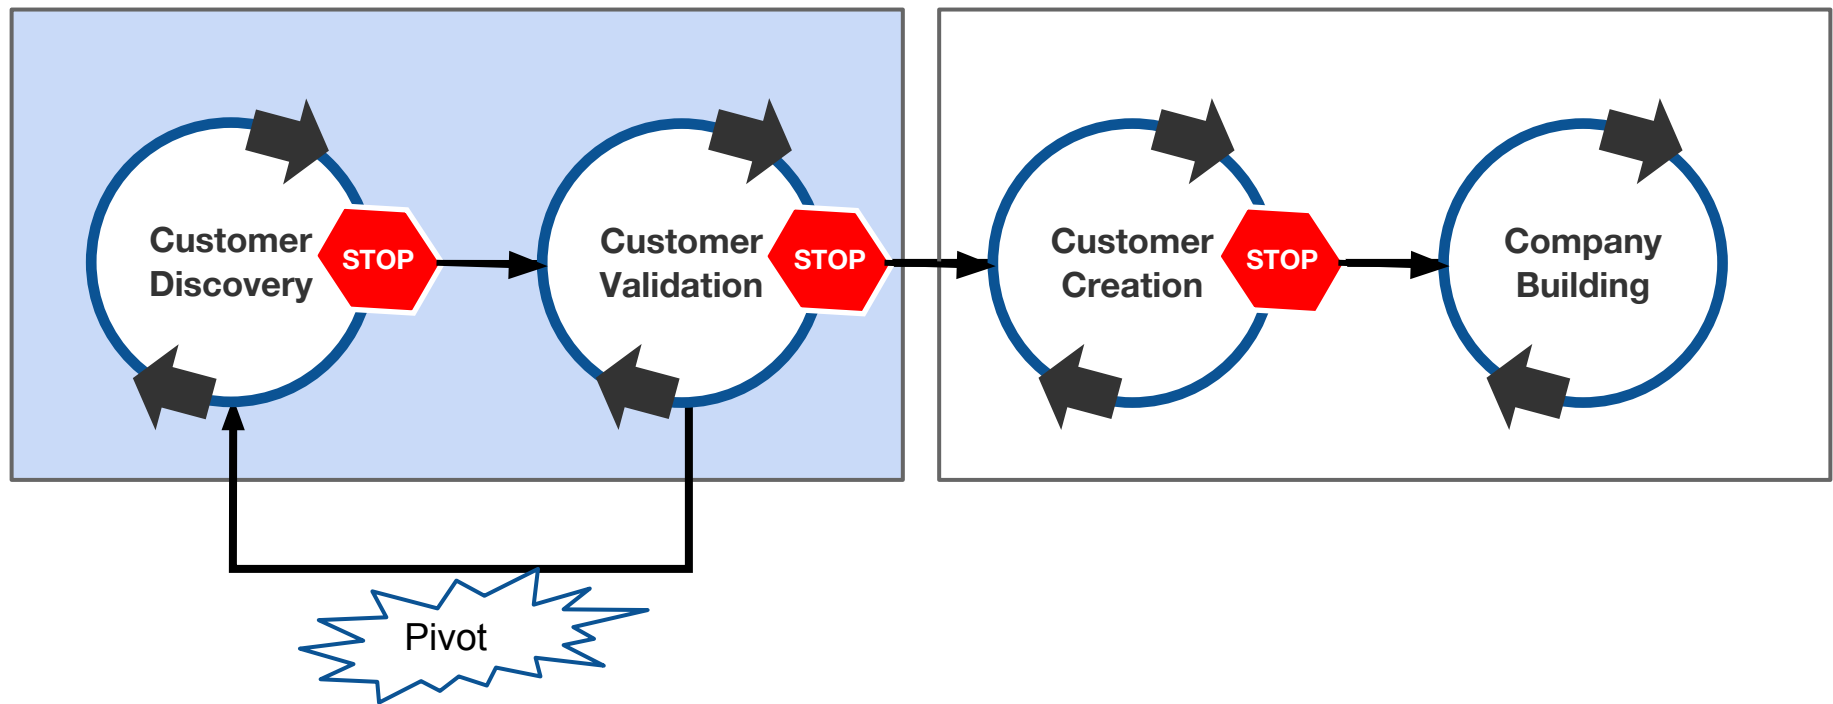

Dave Snowden's Cynefin Framework

Customer Development Model

**Search
(Problem/Solution Fit)**

**Execute
(Product/Market Fit)**

Customer Development Manifesto

1. There Are No Facts Inside Your Building, So Get Outside
2. Pair Customer Development with **Agile Development**
3. Failure is an Integral Part of the Search
4. Make Continuous Iterations and **Pivots**
5. No Business Plan Survives First Contact with Customers. So Use a **Business Model Canvas**
6. Design **Experiments** and Test to Validate your Hypotheses
7. Agree on Market Type. It Changes Everything
8. Startup **Metrics** Differ from Those in Existing Companies
9. Fast Decision Making, Cycle Time, Speed and Tempo
10. Its All About Passion
11. Startup Job Titles Are Very Different from a Large Company's
12. Preserve All Cash Until Needed. Then Spend
13. Communicate and Share Learning
14. Customer Development Success Begins With Buy-In

What is a Business Model?

A business model describes the rationale of how an organization creates, delivers and captures value

-Alexander Osterwalder

Business Model Canvas

<div><div>7. Key Partners</div><div>Who are our key partners and suppliers?</div></div>	<div><div>5. Key Activities</div><div>Which key activities does this business model require?</div></div>	<div><div>1. Value Proposition</div><div>What value do we deliver to the customer?</div></div>	<div><div>4. Customer Relationship</div><div>What type of relationship does each segment require of us?</div></div>	<div><div>2. Customer Segment</div><div>For whom are we creating value?</div></div>
	<div><div>6. Key Resources</div><div>Which key resources does this business model require?</div></div>		<div><div>3. Channels</div><div>Through which channel does each segment want to be reached?</div></div>	
<div><div>9. Cost Structure</div><div>What are our cost drivers?</div></div>			<div><div>8. Revenue Stream</div><div>How much each segment is willing to pay and how would they pay this amount ?</div></div>	

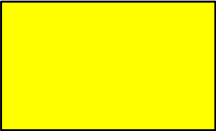

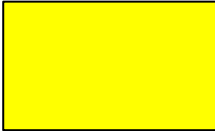

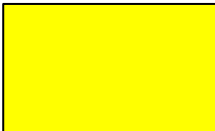

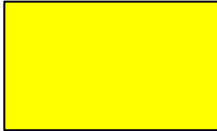

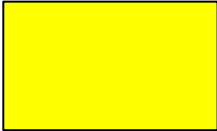

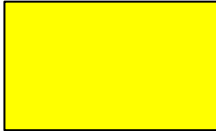

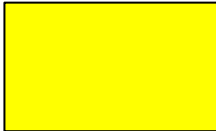

All elements of BMC are Hypotheses

<div><div>7. Key Partners</div><div>Who are our key partners and suppliers?</div></div>	<div><div>5. Key Activities</div><div>Which key activities does this business model require?</div></div>	<div><div>1. Value Proposition</div><div>What value do we deliver to the customer?</div></div>	<div><div>4. Customer Relationship</div><div>What type of relationship does each segment require of us?</div></div>	<div><div>2. Customer Segment</div><div>For whom are we creating value?</div></div>
	<div><div>6. Key Resources</div><div>Which key resources does this business model require?</div></div>		<div><div>3. Channels</div><div>Through which channel does each segment want to be reached?</div></div>	
<div><div>9. Cost Structure</div><div>What are our cost drivers?</div></div>		<div><div>8. Revenue Stream</div><div>How much each segment is willing to pay and how would they pay this amount ?</div></div>		

The one thing you are trying
to validate throughout
"problem/solution fit" is...

“Is my Hypothesis Correct?”

Hypotheses

7. Key Partners  	5. Key Activities  6. Key Resources 	1. Value Proposition 	4. Customer Relationship  3. Channels	2. Customer Segment   
9. Cost Structure  		8. Revenue Stream  		

Iterating on Hypotheses

String of multiple experiments run together to *test these hypotheses* towards achieving a specific goal, such as product/market fit

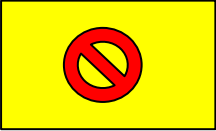

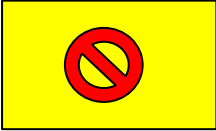

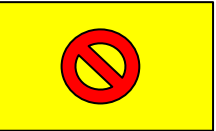

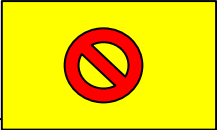

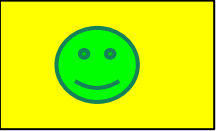

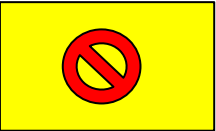

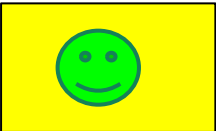

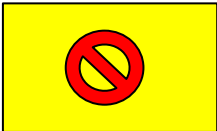

Run an experiment

- Prototypes (lo-fi)
- Videos
- Mock websites/software
- SEO keywords
- and the most expensive way ... Build the actual feature

Iterating on Hypotheses

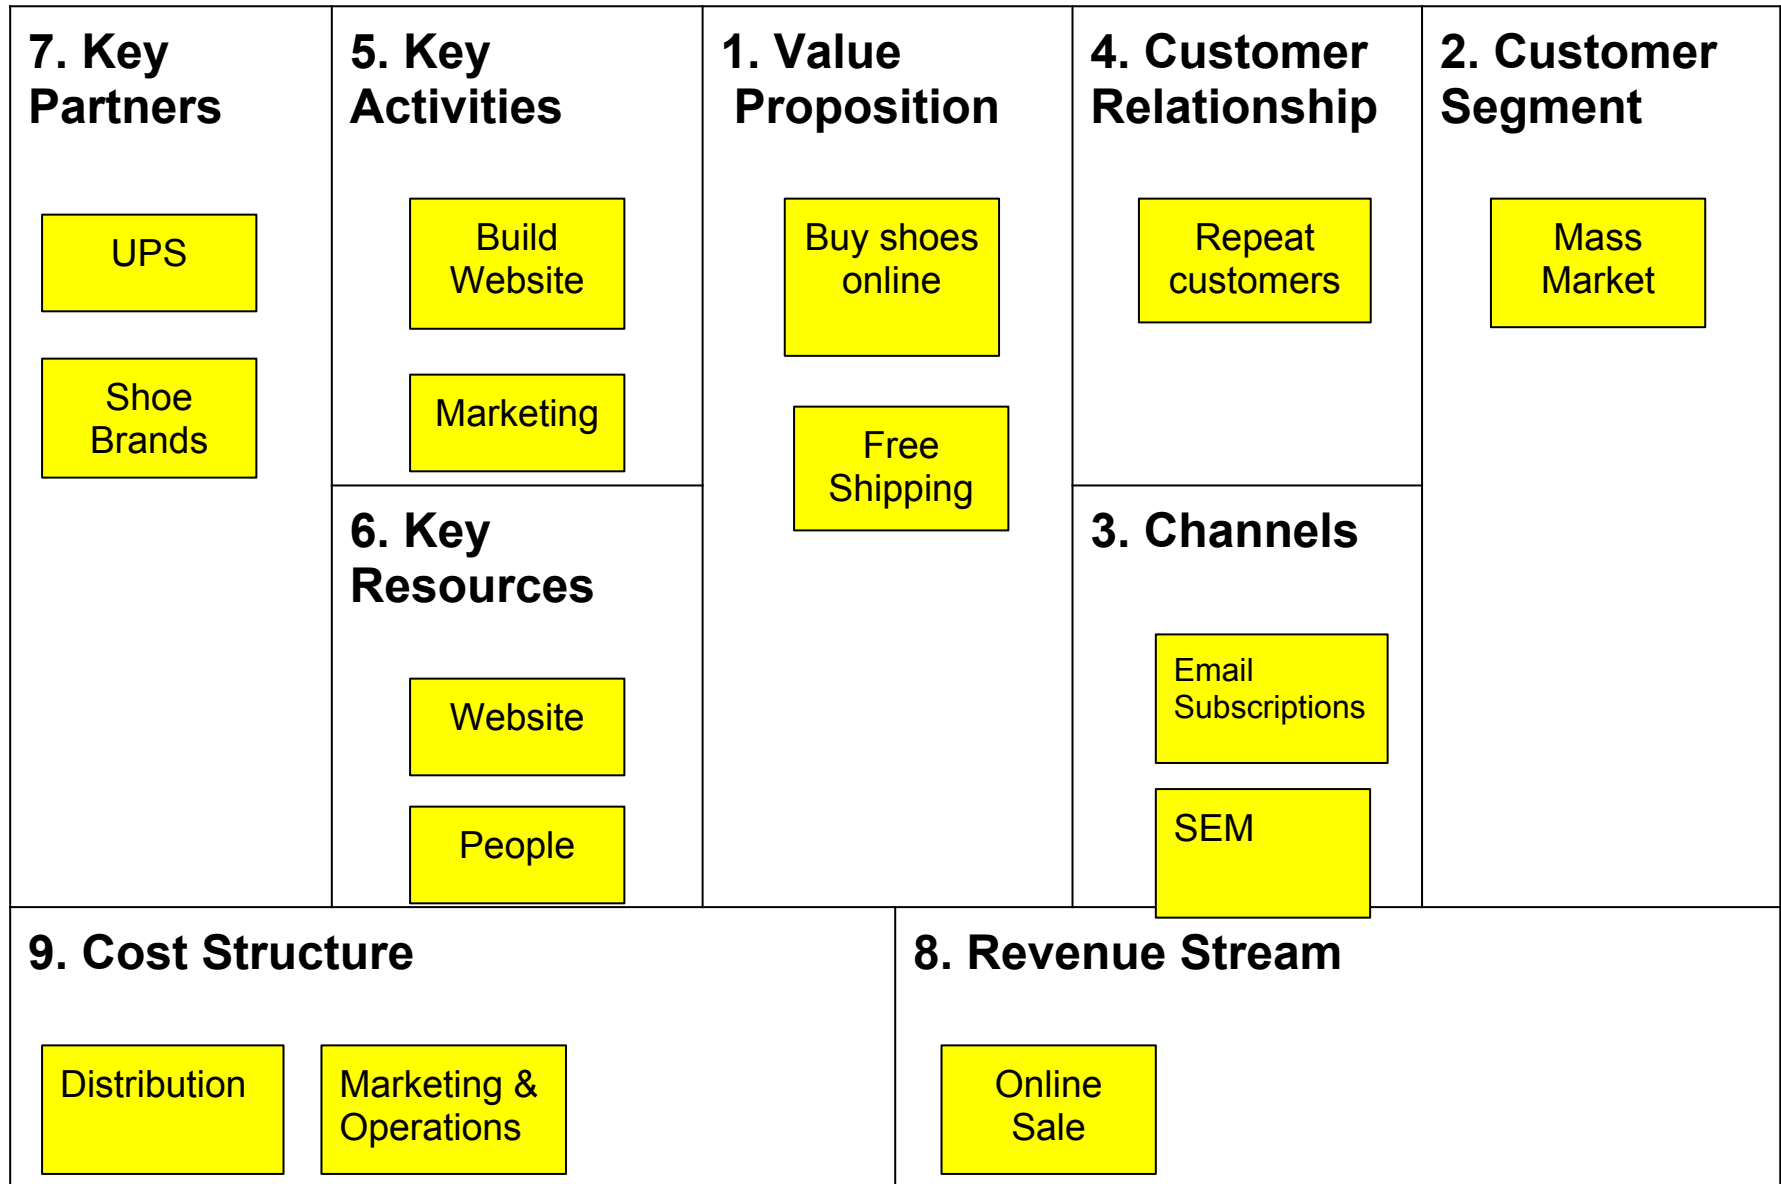

Hypotheses

7. Key Partners  	5. Key Activities  6. Key Resources 	1. Value Proposition    	4. Customer Relationship  3. Channels  	2. Customer Segment   
9. Cost Structure  		8. Revenue Stream   		

BMC for Zappos.com

Vanity vs. Actionable Metrics

The Curse of Vanity Metrics

"Mirror, Mirror On The Wall, Why Does My Revenue Stall?"

Dave McClure's AARRR

Acquisition

How do users find you?

Activation

Do users have a great first experience?

Retention

Do users come back?

Revenue

How do you make money?

Referral

Do users tell others?

How do you validate your learning?

- Cohort Analysis
- Multi-variate (A/B) testing
- Crowdfunding

Design

Pebble: E-Paper Watch for iPhone and Android

by Pebble Technology

Pebble is a customizable watch. Download new watchfaces, use sports and fitness apps, get notifications from your phone.

📍 Palo Alto, CA

SUCCESSFUL!

ABOUT THIS PROJECT

We did it! We've reached our funding goal, and I'm thrilled to be able to produce this screencast. Funding remains open through June 5th, which means you can still join the 600+ people who have backed this project so far. More funding means more stuff! Here are the goals we've reached so far:

- **\$12,000:** Project funded!
- **\$14,750:** Professional site design! (*details in [update #4](#)*)
- **\$17,000:** Three episodes per week, not two! (*details in [update #6](#)*)
- **\$21,000:** Increased hosting capacity! (*details in [update #6](#)*)
- **\$28,000:** Let's Play TDD distilled! (*details in [update #6](#)*)
- **\$29,750:** More student registrations! (*details in [update #7](#)*)

BUY ME A BEER: You love the idea, but you don't want the videos. That's okay. I'll toast you as I drink one of Portland's fine microbrews.

Estimated Delivery: Jun 2012

PLEDGE \$10 OR MORE

25 BACKERS

FIRST MONTH: Get the first 8 "Live" & "Caffeinated" episodes and the first 2 "Lessons Learned" episodes. Viewable on the web & downloadable. DRM-free. Source code included.

This is not just for software...

Books are “iterated” this “lean startup way”
to gain traction among readers

"I've sold over 10,000 copies of Running Lean as a self-published e-book. A second edition is in the works which will be published by O'Reilly in early 2012."

-Ash Mayura

<http://www.ashmaurya.com/about/>

Answer: Your money is going into a holding account, where it will be held until your vehicle is ready. It will then be applied to the total cost of the vehicle.

RESERVE YOUR C-1

- FALL IN LOVE ALL OVER AGAIN -

Reserve your C-1 for as little as \$250 USD.

Higher pre-order pricing tiers move you up in the queue. See the drop-down box below for more details.

Please fill out the information below:

Deposit	<input type="text" value="Deposit Amount*"/>
Salutation	<input type="text" value="---"/>
First Name*	<input type="text" value="First Name*"/>
Last Name*	<input type="text" value="Last Name*"/>
Address*	<input type="text" value="Address*"/>
City *	<input type="text" value="City *"/>
State *	<input type="text" value="State *"/>
Postal Code / ZIP*	<input type="text" value="Postal Code / ZIP*"/>
Country*	<input type="text" value="United States"/>
E-mail*	<input type="text" value="E-mail*"/>
Phone Number*	<input type="text" value="Phone Number*"/>

- + Where is my money going?
- + If I change my mind, can I get a refund?
- + Do I need a motorcycle license to drive a C-1?
- + What is the range of the C-1?
- + How long does it take to charge?
- + Can it carry two people?

HANDLE THE EXCITEMENT

Kent Beck at Startup Lessons Learned Conference...

- Team vision and discipline over individuals and interactions
- Validated learning over working software
- Customer discovery over customer collaboration
- Initiating change over responding to change
